Sub
B2

4. A pneumatic gun for shooting a paintball, comprising:
 - a gun body having first, second and third bores, said first, second and third bores having respective first, second and third longitudinal axes, the first, second and third longitudinal axes being parallel to one another and spaced apart from one another, said first bore having a chamber;
 - a hammer for releasing compressed air into the chamber, said hammer being slidable within said second bore;
 - a bolt; and
 - a rod for actuating said bolt, said rod being slidable within said third bore.

5. A pneumatic paintball gun, comprising:
 - a source of compressed air;
 - a gun body having a bore with an external opening;
 - a pneumatic assembly in fluid communication with said source, said pneumatic assembly having a first member slidably coupled to a second member, said pneumatic assembly being located within said bore; and
 - a third member coupled to said bore and covering said opening, said third member being externally accessible and repeatedly removable;wherein removal of said third member permits said pneumatic assembly to be removed from said bore, and said first member is retained by said second member after removal from said bore.

cont A1

6. The pneumatic paintball gun of claim 5, wherein said pneumatic assembly is a pneumatic regulator, pneumatic ram, or pneumatic hammer.

7. The pneumatic paintball gun of claim 5, wherein said third member is threadably coupled to said bore.

8. The pneumatic paintball gun of claim 5, wherein said pneumatic assembly is a cartridge valve.

9. An apparatus comprising:
a pneumatic paintball gun;
a source of compressed air;
a first pressure regulator in fluid communication with said source, said first pressure regulator providing compressed air to said paintball gun at a first predetermined air pressure; and
a second pressure regulator in fluid communication within said source, said second pressure regulator providing compressed air to said paintball gun at a second predetermined air pressure, the second predetermined air pressure being less than the first predetermined air pressure.

10. The apparatus of claim 9, further comprising:
an electronic solenoid, wherein at least a portion of the compressed air at the second predetermined air pressure is provided to said solenoid.

11. The apparatus of claim 9, further comprising:
a barrel, wherein at least a portion of the compressed air at the first predetermined air pressure is provided to said barrel to propel a paintball, and at least a portion of the compressed air at the first predetermined air pressure is provided to said second pressure regulator.
12. An apparatus comprising:
a source of compressed air;
a pneumatic paintball gun having a barrel, said barrel being in fluid communication with said source;
a bolt slidable within said barrel from a firing position to a reloading position, said bolt including a pin slidable from a first position to a second position;
a pneumatic actuator for sliding said bolt within said barrel, said pneumatic actuator being in fluid communication with said source;
wherein sliding said pin to the first position couples said bolt to said pneumatic actuator and sliding said pin to the second position uncouples said bolt from said pneumatic actuator.
13. The apparatus of claim 12, further comprising:
an external groove, wherein a portion of said pin is slidable within said groove, and said pin includes an end which protrudes through the groove and above the external surface of said paintball gun.

cancel A1

14. The apparatus of claim 12, wherein said pin includes a first recess and a second recess, and which further comprises a spring-loaded member, wherein said pin is retained in the first position when said member is in the first recess, and said pin is retained in the second position when said member is in the second recess.--

Enclosed is a check in the amount of \$80.00 to cover the fees for two independent claims in excess of the three for which Applicant previously paid. No further fees are believed to be necessary, however, should any fees be deemed required, please charge such fees to Deposit Account No. 23-3030, but not to include any payment of issue fees.

Respectfully submitted,
